HACK for the SEA

A Hackathon about Marine Science in Volatile Times

THE EVENT
The 2nd Annual Hack for the Sea is a three day technology competition where students and professionals form teams to "hack" on the biggest problems facing our oceans today.

THE CHALLENGE
We live in extremely volatile times, and it's often science that pays the price. In addition to the traditional maritime theme, we are encouraging hackers to seek sustainability and longevity in their submissions. Additional details forthcoming.

Questions? Email mark@mrh.io or (978) 328 4466

WHO
Students, software & hardware engineers, designers, subject matter experts and more are all encouraged to participate in the Hack for the Sea.

WHEN? SEPT 15-17, 2017
Friday Night Panel discussion and team formation
